Letter of Reference for IMS Masonry, Inc.

I am confident in writing this letter of recommendation based on our professional association over the past several years with IMS Masonry, Inc. We have found IMS Masonry, Inc. to be an intelligent, trustworthy and quality oriented masonry construction company.

One project I would like to reference is the Rocky Mountain Jr./Sr. High School Project. This is an articulate project with multiple colors of brick incorporated into the design. IMS Masonry, Inc. is commended for their masterful work and range of skill on this project.

A second project to mention would be the Thermopolis WYDOT Shop Complex Project. This was construction of a new facility, approximately 46,579 sq ft building with masonry and brick veneer which Barton Construction, Inc. successfully completed with ease.

On both projects our experience with IMS Masonry, Inc. concluded that their company is reliable, skilled, pays attention to detail and holds excellent time management skills. They are professional and their end result revealed satisfaction and quality in their work. The Owner's are pleased with their efforts.

Without hesitation I would recommend IMS Masonry, Inc. to serve your masonry needs.

Dan Odasz, AIA
