Subject: IMS Masonry

Sirs,

This letter is to recommend IMS masonry. IMS completed a CMU Chemical Storage Facility on the IMFT campus in Lehi, Utah for Hoffman Construction Company this past year.

All of the IMS people I dealt with on the project were committed to its success. In particular the foreman and safety person on the job were committed to both the schedule and the safe execution of the work.

All of the equipment brought onto the site was of top quality and well maintained, which lessened downtime and increased productivity.

The project was fastrack with numerous design changes along the way. Both IMS's office and field staff adapted to these changes and kept the work on track.

For quality, integrity and commitment to project goals I cannot recommend IMS too highly. They did an outstanding job.

If you have any questions concerning IMS, please feel free to call me.

Yours Truly,

Jim Sanders
