Lindon, Utah 84042

**Subject: IMS Masonry Work History**

Dear Mr. Johnson:

I wanted to take a moment to reflect on the past several years that we have worked together on a vast amount of projects from little video stores to multi-story structures up to hundreds of thousands of square feet.

Consolidated Engineering Laboratories (CEL) is a company that provides special inspections and construction materials testing. As a partner in the business and being in the quality control industry in Utah over the past twenty five years I have seen a great deal of construction performed by many, many contractors. It is with this experience and knowledge of the industry that I make these comments.

As we all know not all jobs go as planned and this is exactly what gives teams the chance to react in a manner in which separates the exceptional companies apart from the regular contractors. I know that with my past experience with you and your team, your firm is by far one of the exceptional ones. When it comes to quality your leadership has enabled you to continually meet and exceed our expectations as it relates to code and document enforcement on projects as well as architectural appearance.

I can say that our lives, as inspection firms, would be greatly served by having more companies like yours around. I truly look forward to many more years with our two teams working side by side creating masterpieces for a deserving clientele.

Respectfully Yours  
Consolidated Engineering Laboratories

Charlie Trujillo  
General Manager/Principal
